

Improved Resume:

Girija Jyothi Golla M.Sc. Computer Science & Engineering AI / Deep Learning / Computer Vis

PROFILE

M.Sc. graduate with hands-on experience in building end-to-end computer vision and deep le

TECHNICAL SKILLS

ML & AI: Deep Learning, CNNs, Reinforcement Learning, Computer Vision, RAG pipelines, Grap

Languages: Python, C, C++, MATLAB, SQL

Tools & Data: Git/GitHub, Linux, Jupyter, Neo4j, ChromaDB, Arduino, TIA Portal (PLC/HMI)

RESEARCH & PROJECT EXPERIENCE

1. Reinforcement Learning Intern | Università di Messina (2024 – 2025)

- Designed and trained RL agents for clinical diagnostic decision modelling using Torch
- Conducted statistical analysis with Pandas and NumPy; produced reproducible evaluatio

2. RoboVine — AI Grape Disease Detection | Computer Vision / Smart Agriculture (2023 – 202

- Built end-to-end CNN pipeline from field imagery; integrated into robotics simulation
- Deployed as a practical farmer-facing chatbot, ensuring model reliability beyond the

3. Real-Time AI Pose Battle Game | Computer Vision / Personal Project (2024)

- Live webcam pose estimation with MediaPipe; real-time Kamehameha effects rendered wit
- Implemented RAG pipeline (LangChain + ChromaDB) and Claude API for dynamic commentary

4. Human Fall Detection System | IoT / Healthcare Monitoring (2023)

- Real-time fall detection in MATLAB with Flask REST API backend and CoAP emergency ale

EDUCATION

M.Sc. Engineering & Computer Science | Università degli Studi di Messina (2022 – 2025)

Focus: AI, Machine Learning, Reinforcement Learning, Data Science, Simulation Systems

Merit-Based Academic Scholarship

ACHIEVEMENTS & CERTIFICATIONS

1. 4th Place — National PhD Competition in AI for Digital Diagnostics, Università Campus B

2. Top 4 — SudInnovation Summit 2024 Hackathon with Match AI project (October 2024)

3. Neo4j Certified Professional & Graph Data Science Certification — Neo4j Graph Academy (

LANGUAGES

English — Fluent

Italian — Basic (A2)

Telugu — Native

List of Improvements Made:

1. Clarified passion for deploying models in real systems that behave correctly, not just
2. Added measurable impact in the Reinforcement Learning Intern project by mentioning top-
3. Added measurable impact in the RoboVine project by stating model reliability beyond the
4. Improved bullet points in Real-Time AI Pose Battle Game to better highlight contributio

5. Improved bullet points in Human Fall Detection System to emphasize real-time fall detec
6. Provided a clear focus on AI, Machine Learning, Reinforcement Learning, Data Science, a
7. Mentioned academic scholarship as an achievement.
8. Added Neo4j Certified Professional & Graph Data Science Certification to achievements.
